Brief

I'm a full-stack developer and a Software Engineering student at Mekelle University. I build practical, fast web applications with React, Next.js, TypeScript, Node.js and Express, and I also develop mobile apps for Android and iOS. My work ranges from a movie-discovery app powered by the TMDB API to a production website with an admin console for a real organization in Dessie. I care about clean interfaces, reliable code and shipping work people actually use.

Projects

Addisalem Film Academy
2026
addisalemfilms.com

- React 19, Vite, TypeScript, Tailwind CSS 4, Firebase, Cloudinary, EmailJS, Vercel
- Built and shipped a full website for a film training academy in Dessie: programs, facilities, awards gallery, student portfolio and an online enrollment form.
- Added a protected admin console using Firebase Auth and Firestore to manage site content, with images served through Cloudinary.
- Prerendered routes and SEO / social-sharing metadata for fast loads and clean link previews.

Axora Movies
2025
axora-movies.vercel.app

- React, Tailwind CSS, React Router, TMDB API, Vercel
- Built a web app to browse movies and series with detail pages, search and similar-title recommendations.
- Added trailers in a modal and a watchlist to add and remove titles; deployed live on Vercel.
